UNLOCK HORMONAL POTENTIAL. SUPPORT REPRODUCTIVE HEALTH & VITALITY.

KISSPEPTIN — ADVANCED PEPTIDE RESEARCH

Kisspeptin is a naturally occurring peptide that plays a critical role in regulating the hypothalamic–pituitary–gonadal (HPG) axis by stimulating the release of gonadotropin-releasing hormone (GnRH). Preclinical studies suggest potential benefits for reproductive health, hormone optimization, sexual function, and overall vitality.

Explore the potential of Kisspeptin in cutting-edge peptide research.

SUPPORTS HPG AXIS FUNCTION*

Kisspeptin stimulates the release of GnRH, helping to regulate the hypothalamic–pituitary–gonadal (HPG) axis in research models.

MAY SUPPORT REPRODUCTIVE HEALTH*

Research suggests potential benefits for fertility, sperm quality, and ovarian function in preclinical studies.

ENHANCES LIBIDO & SEXUAL FUNCTION*

Preclinical studies indicate Kisspeptin may improve libido and sexual performance.

HORMONE OPTIMIZATION*

May support natural hormone balance and testosterone production in preclinical research.

ADVANCED PEPTIDE RESEARCH

A cutting-edge peptide for researchers investigating reproductive health, hormone function, and vitality.

RESEARCH-GRADE QUALITY

Manufactured under strict quality standards for laboratory research use only.

*For laboratory research purposes only.

WHY RESEARCH KISSPEPTIN?

- ✓ Stimulates GnRH release to support HPG axis function
- ✓ May support reproductive hormone balance in research models
- ✓ Studied for potential improvements in fertility and reproductive health
- ✓ May enhance libido and sexual function in preclinical studies
- ✓ A promising tool for hormone optimization and vitality research

PRODUCT SPECIFICATIONS

- Peptide: Kisspeptin-10
- Purity: ≥ 98% (HPLC)
- Appearance: White Lyophilized Powder
- Molecular Formula: $C_{46}H_{89}N_{13}O_{12}$
- Molecular Weight: ~10071.0 Da
- Quality Control: HPLC & Mass Spec Verified
- Quantity: 10 mg per vial
- Storage: 2°C - 8°C (Refrigerated)

RECONSTITUTION

Add 2.0 mL of Bacteriostatic Water (BAC Water) to the vial to reconstitute.

Resulting Concentration:
5 mg / mL

Each 0.1 mL (10 units) = 0.5 mg (500 mcg)

RESEARCH DOSING GUIDE* (SUBCUTANEOUS INJECTION)

DOSING SCALE	DOSE	UNIT DOSAGE	FREQUENCY
1 (START LOW)	200 mcg	4 units (0.04 mL)	1x/day, every other day
2	300 mcg	6 units (0.06 mL)	1x/day, every other day
3	400 mcg	8 units (0.08 mL)	1x/day, every other day
4	500 mcg	10 units (0.10 mL)	1x/day, every other day

Start at the lowest dose. Increase only as tolerated and necessary to sustain benefits.

*For laboratory research purposes only.

HIGH PURITY
≥ 98% Purity
